The 1-D bin packing problem optimisation using bees algorithm 323-326
Natalia Hartono, Asrul Harun Ismail, Sultan Zeybek, Mario Caterino, Kaiwen Jiang, Murat Sahin, Christine Natalia

Index of authors xii

Editorial Preface

Assalamualaikum wr wb.

Praise be to Allah SWT who always gives us all health. The editorial board expresses its deep gratitude to the authors who have submitted their articles to the Journal Industrial Services (JISS) in this issue. We would like to express our appreciation to the members of the editorial board and reviewers who have contributed to this edition.

Journal of Industrial Services (JISS) vol. 7 no. 2 consists of 21 articles submitted by authors from 17 universities in 4 countries (Indonesia, England, Turkey, and Italy). It is an honor for us who have won the trust of various writers.

The editorial board always strives to improve the quality of JISS. Currently, JISS is a journal that has been accredited by Dikti with the rank of Sinta 4. The editorial board is trying to improve the JISS rating. One of the efforts made by the editorial board is to add an editorial advisory board from Waseda University, Prof. Shigeru Fujimura. We also increased the number of international reviewers (Dr Wen Song and Fellek Getu Tadesse) to improve the quality of submitted articles. In addition, we plan to publish articles in English from October 2022.

The next edition of JISS will be published in June 2022. We always welcome constructive criticism and suggestions to improve the quality of JISS.

Wassalamualaikum wr wb
